

Description of Variables – ‘bullying.sav’ dataset

Variable Name	Label	Values ¹	Measure
ID	No Label (Unique identifying number for each case)		Nominal
RSEX	Q1 - Are you male or female?	1 Male 2 Female 99 Not answered	Nominal
TYPESCHL	Q20 - What type of School do you (did you last) attend?	1 Planned Integrated 2 Grammar 3 Secondary 4 Other 99 Not answered	Nominal
SCLOTBUL	Q22 - Would you say students at your school get bullied by other students?	1 A lot 2 A little 3 Not at all 4 Don't know 99 Not answered	Nominal ²
STFBULJB	Q23 - Are there particular staff at your school whose job is to deal with bullying?	1 Yes 2 No 3 Don't know 99 Not answered	Nominal ³
GOTOSTAF	Q24 - Do you think most people - if they were being bullied - would or would not go and talk to one of these members of staff?	-1 Skip, no particular staff 1 Would talk to them 2 Would not talk to them 3 It depends 4 Don't know 99 Not answered	Nominal
SCHLBUL	Q25 - In general, do you think your school provides real help for the people who are bullied or not?	1 Yes 2 No 3 Don't know 99 Not answered	Nominal ³
UBULLSCH	Q26 - Have you yourself ever been bullied in school?	1 Yes 2 No 99 Not answered	Nominal ³
OFTENBUL	Q27 - How often have you yourself been bullied in the last two months in school?	-1 Skip, not bullied 1 A lot 2 A little 3 Not at all 99 Not answered	Ordinal
UBULLOTH	Q28 - Have you yourself ever taken part in bullying other students?	1 Yes 2 No 99 Not answered	Nominal ³
OFTENUB	Q29 - How often have you taken part in bullying at school in the last two months in school?	-1 Skip, have not bullied 1 A lot 2 A little 3 Not at all 99 Not answered	Ordinal

¹Values -1 and 99 defined as missing

²Could be ordinal if the category '4 Don't know' is defined as missing

³It is possible for some dichotomous variables (i.e. those with just two categories) to be ordinal. However, and as explained in the book (see p. 77), all dichotomous variables are defined as nominal for the purposes of analysis.
